Report on “Best out of waste”

Pre-Primary Department

Little hands and imagination minds came together in a creative burst of energy during the “Best out of waste” activity held on July 3rd, 5th and 7th 2023 in our Preprimary section. The event was focused on bringing an understanding among the children about preserving the environment by reusing and recycling waste material.

Excellent ideas were demonstrated using material like brown paper bags, old CDs, paper cups, and egg carton boxes.

All the Pre-Primary teachers of class nursery, Junior KG, Senior KG and Montessori I, II, and III were actively involved to make children understand the importance of preserving the environment and to learn more about sustainability. The little ones were made to understand that we should not throw away waste things, we could use them again for different purposes and that we should not cause harm to nature and our surroundings.

On 03/07/2023 The Nursery children made an art display made of old egg cartons and colored them beautifully. The Montessori I, II, and III students made a decorative basket out of paper cups and painted it with different colors which displayed their creative side. On 05/07/2023 The senior KG students made a decorative photo frame out of old C.D's. On 07/07/2023 The Junior KG students made a hand puppet of a puppy out of recycled brown paper bag and decorated it.

We conclude by thanking our school Principal Rev. Brother Antony for all the encouragement to the students. A special gratitude and thank you to our Pre-Primary coordinator Mrs. Sonia ma'am for organizing and supporting the teachers and students in all the activities conducted during this week.
